

Dentistry and Oral Surgery Residency

Applications are invited for Eastcott Veterinary Referrals' residency training programme in Veterinary Dentistry and Oral Surgery. The programme will allow the successful candidate to gain in-depth knowledge in veterinary dentistry and its supporting subjects. The programme will offer the opportunity to prepare a credentials package for eligibility for examination by the European Veterinary Dentistry College.

The position is a full time, fixed, 36 month contract and will commence January 2023. The role has a balance of 80 percent clinical and 20 percent out of clinics. During the clinical component, the candidate will be involved with direct management of cases, performance of all forms of dental and oral surgical procedures and client communication under the supervision of senior members of the department. The successful candidate will also undertake preparation of scientific articles for publication, development of their teaching

and presenting skills and externships in diagnostic imaging, surgery and anaesthesia. Eastcott Veterinary Referrals is a vibrant and highly productive environment where we believe passionately in supporting clinical excellence, professional and personal development. The successful candidate will likely have had experience of both primary care and referral clinical environments and demonstrated a clear desire to undertake the challenges of specialist training, ideally including academic publication, in dentistry and oral surgery.
